

QUICK GUIDE: myStop® Phone App

The myStop® phone app allows riders to set one- time alerts, see stop locations, view next departure times, plan trips, see costs and transfers, submit feedback, view public messages for service changes. Riders can even text the agency short code and the stop ID to '321123'- to get next departure times sent to a phone. It's that quick and that easy!

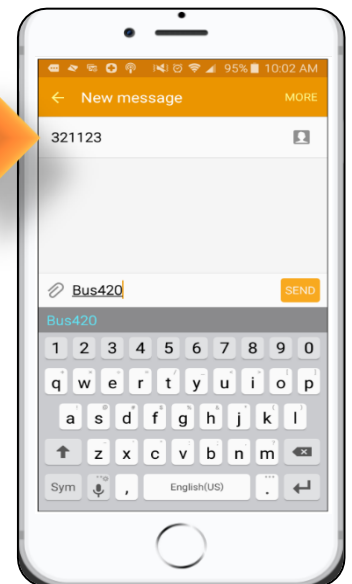

Grant GPS Access

- Open your phone app store
- Search for myStop®
- Download the app then open it
- 'Walk through' a built- in tutorial (to see how the app works)
- Grant GPS location access when prompted
- Next, all agencies will display
- Click on the **transit agency** you need
- **Select Routes-** click to choose the route you need, to view its stops and to see where vehicles are in real time on the map!
- Click on **Trip Planning** to plan a trip
- Click on **View Service Alerts** to view service messages:
 - Changes in service (reduced, special, weather, detours, etc.)
- Click the star to save stops to your favorites
 - Click on the 3 lines to view all stops, submit feedback, or adjust your settings: use Accessibility Mode or to choose another transit agency

Text the stop ID to '321123' for next departures

- Standing at your bus stop and need to know when the next bus is coming?
- Text the transit agency's short code and the Stop ID number to **321123** to receive an auto-response for the next departure times on your phone

After you select your agency its routes will display.

Click 'Select Routes' to choose your route and view real time information for stop departures on the map!
