

QUICK GUIDE: myStop (InfoPoint) Webpage

The myStop webpage allows riders to see real time passenger information! They can create an account for recurring alerts or set one-time alerts, see all stop locations for routes, view next departure times, plan trips, see costs and transfers, submit feedback, view public messages for service changes, and even see how many people are onboard.

1. Enter the transit agency's myStop® webpage location into a search engine (Edge, Chrome...)
2. Use the Routes menu to select the route/s you want to view on the map
 - The **Commuter A** and **Local 2** routes are currently displayed
3. The Stops menu will display all stops for the routes you've selected.
 - Use this menu to see stop names, stop ID's, departure times, and for setting alerts
4. Click on a bus bubble/ stop location on the map to view next departure times, its destination, how many people are onboard, and more
 - Stop locations are indicated by grey circles and blue clocks
5. Click on Trip Planner to plan a trip
 - Select start and end points, use dropdown menu to select times for travel)
6. Click on Set Alert to create a one- time alert
 - Or create an account to receive recurring alerts by email/ phone
7. Click Public Messages to view messages for updates/ changes in route service (detours, holiday changes, etc.)
8. Click 'Try myStop' to create an account to receive recurring alerts for all stops you need!
 - Click on 'Log in Here' to access your account
